Internal evaluations have shown that the new -1 variants are a close match to the existing products , and we do not envisage customers having difficulty to change to the new alternatives .

At the same time if needed samples of the ' new -1 products ' should be available in September . When the new products are available the 'old products ' will be withdrawn and last deliveries can only be made in November .

In these case Technical request should be managed by either Sebastien Lichtle or Laurent Chouvet .
