

Enriching lives through innovation

Basel, 20th December 2016

Introduction - New Product - ARALDITE® 2048-1

Dear Valued customer,

We are pleased to inform you that ARALDITE® 2048-1 Black is now available in our Adhesives product range. We have now stopped making ARALDITE 2048, and when stock are sold out will delete it from the product range

Essentially ARALDITE® 2048-1 is the same as ARALDITE® 2048 except when applied gives a 'black' bond line rather than 'pink'. This change of colour was made due to increasing requests coming from the end users of our adhesives having applications involving metal or composites. The technical properties of the new product are the same as before and equivalent cartridge types, just the colour has changed. We enclose the technical data sheet in English for your assessment.

Full details

	OLD si Description		NEW si Description
2009908	ARALDITE 2048 6X480ML PCK BL1	3972308	ARALDITE 2048-1 6X480ML 1PCK BL1
1790608	ARALDITE 2048 6X6X50ML 1PCK BL1	3972408	ARALDITE 2048-1 6X6X50ML 1PCK BL1

Note: For ARALDITE 2048 6X480ML PCK BL1 we have significant stock coverage, so prefer to sell out the old version first

For our existing customers there are no changes to our commercial terms. Samples will be available on request from our sampling agent. We do recommend that customers test the new adhesive in their specific application

If you have any further questions, please feel free to contact your usual Sales representative.

Yours sincerely,
Huntsman Advanced Materials (Europe) BVBA
