**Subject:** - Audit for repacking

In February 2018, Shell Aviation was asked to consider the approval of Silmid, UK, as an authorized repacker for AeroShell lubricants in order to supply products to customers requiring specific non-standard pack sizes.

Silmid successfully passed all Shell Aviation requirements and was appointed as an official repacker until February 2021.

The current pandemic situation has prevented Shell Aviation to perform a new audit on site to renew the authorized repacker agreement.

In lieu of an on-site audit a temporary self-audit process is created to allow extension of the previous approval.

Following a review of information provided by Silmid including:

- Confirmation of accreditation to ISO 9001
- Silmid BP5 repack process 2021
- The option to use of Intertek laboratory, Farnborough as an accredited laboratory for testing.
- Confirmation that laboratory results are checked by Simon Hope (Quality Manager) before release of the product.
- Confirmation that Silmid will allow Shell Aviation to perform an on-site audit at first opportunity after current Covid situation

Shell Aviation is pleased to confirm that:

Sil-Mid  
Unit 1 & 2 Roman Park  
Roman Way,  
Coleshill,  
Birmingham, B46 1HG

is appointed as approved repacker of AeroShell Fluids.

This approval is valid from the date of the letter till next Shell Aviation audit to perform before end February 2022.

Yours faithfully

Olivier Procès DIA/20  
Regional Technical Manager EMEA  
Shell Aviation
