

Specialty Lubricants Cross Reference

The below guide illustrates a range of specifications available for **Specialty Lubricant** products, covering French, UK and US Military organisations. Also included for reference are the corresponding NATO codes and Joint Service Designations.

It is recommended that the individual product/pack size combination is checked before placing an order to ensure that the required specification will be certified, and you should always refer to your aircraft maintenance manual (AMM), component maintenance manual (CMM) or qualified products list (QPL) for final approval. This list is subject to change at any time.
