

AEROSHELL COMPOUND 07

De-icing fluid

Shell Aviation

AEROSHELL COMPOUND 07 IS MANUFACTURED TO STRICT QUALITY CONTROLS AND HAS BEEN USED BY OUR CUSTOMERS FOR DECADES.

ABOUT AEROSHELL COMPOUND 07

Pilots have trusted **AeroShell Compound 07** for many years to remove hoar frost, light snow and ice from their planes before take-off and for use in their in-flight de-icing systems.

AeroShell Compound 07 de-icing fluid is a precise mix of ethylene glycol, isopropyl alcohol and distilled water manufactured under **strict quality control**. It can be used in CAV's TKS de-icing systems, which are fitted to some models of Beechcraft, Diamond, Cessna, Cirrus, Hawker, Kodiak, Mooney, Piper and other aircraft.

BENEFITS AT A GLANCE

- Trusted for decades
- Manufactured under strict quality control

APPLICATIONS

AeroShell Compound 07 is used for

- in-flight de-icing of windscreens, propellers, wings, tailplanes and other items on suitably equipped aircraft
- removing hoar frost, light snow and ice from parked aircraft.

It can be sprayed undiluted or mixed with up to 50% water, depending on the severity of the icing conditions, the efficiency of the spraying technique and whether it is applied hot or cold.

SPECIFICATIONS

- Approved DTD-406B (UK) (obsolete)
- NATO Code S-745
- Joint Service Designation AL-5 (UK)
